

**AUDIT WITH
INSIGHT,
ACT WITH
CONFIDENCE**

The real audit risk?

Mistaking activity for assurance.

Without integration, visibility, and accountability, audit becomes a checkbox not a safeguard.

For many organisations, audit remains a fragmented, reactive process, driven by manual effort, static checklists, and time-consuming report building. This creates friction, missed insights, and little value beyond compliance.

Common Audit Challenges:

Manual Workloads

Endless spreadsheets, back-and-forth emails, and disconnected documentation.

Siloed Audit Processes

No visibility across functions, controls, or risk owners.

Inconsistent Audit Quality

Varying approaches make it hard to compare or trust findings.

Slow Follow-Up & Tracking

Actions and recommendations fall through the cracks.

Minimal Strategic Value

Audits report history, not future-focused insight.

The outcome? A **resource**-heavy process that ticks boxes, not **drives performance**.

Unify Today makes **audit smart, connected**, and **future-ready** - uniting risk, compliance, and performance insight in **one powerful platform**.

End-to-End Audit

Automation– Plan, execute, track, and report audits from one unified workspace.

Real-Time Risk & Control Integration

Link audits directly to risk registers, compliance obligations, and controls.

Dynamic Action Tracking

Assign findings, owners, and deadlines, with automated follow-up and escalation.

Insightful Dashboards & Reporting

Visualise audit progress, risk alignment, and overdue items at a glance.

Internal Risk Sensing and AI-Powered Anomaly Detection

Audit 100% of the controls 100% of the time allowing you to spot unusual trends, red flags, or recurring issues before they escalate.

The Business Gains

Redefines audit as agile assurance, supporting fast, data-driven decisions and continuous improvement.

Streamline Audit Cycles

Save time and effort across planning, execution, and reporting.

Close Gaps Faster

Real-time tracking keeps audit actions moving and accountable.

Smarter Scope. Stronger Assurance.

Let data guide your audit focus, no more guesswork or wasted effort.

Enhance Audit Quality

Standardise approaches, promote objectivity, and ensure consistency across audits.

Strengthen Internal Controls

Link findings directly to control gaps and mitigation strategies.

Boost Stakeholder Confidence

Provide boards, executives, and regulators with clear, data-backed assurance.

Designed for Modern Audit Teams

- **Pre-integrated** with your risk and compliance data
- Scalable from **team-level reviews** to **enterprise-wide assurance** programme
- Link audits and **findings directly** to your organisations **unique structure**

Audit with Insight. Act with Confidence.

Unify Today, making audit a forward-looking, value-generating capability.
