INSIGHT**

# Your greatest risk?

## Thinking you're managing risk.

**Your greatest risk? Thinking you're managing risk.** Legacy systems and static registers lull businesses into a false sense of control until it's too late.

Modern businesses face a growing storm of risks – operational, regulatory, financial, cyber, and reputational. Yet traditional approaches to managing them are:

**Siloed and Manual** – Manual Spreadsheets, disconnected tools, and reactive processes.

**Lagging Insights** – Reports that are outdated before they're read.

**Poor Risk Visibility** – Leadership lacks a real-time view of evolving threats.

**Inefficient Control Testing** – Hard to track, hard to prioritise, easy to miss.

**Compliance Pressure** – Ever-changing requirements with no automation or audit trail.

**The Result:** Businesses are exposed, slow to act, and unable to turn risk into strategy.

**Unify Today** reimagines **risk management** as a **proactive, AI-assisted,** and **fully integrated** capability that **empowers** faster decisions and sharper control.

### What Sets It Apart:

**Dynamic Risk Registers** – Always up-to-date, centralised, and contextual.

**AI-Driven Risk Insights** – Identify trends, weak controls, and emerging threats.

**Custom Risk Frameworks** – Tailored to your industry, geography, and maturity.

**Real-Time Dashboards** – Visualise top risks and performance in seconds.

**Linked Controls & Actions** – Connect risks directly to mitigation steps and owners.

**Horizon Monitoring** – Track external signals that could blindside your business.

# Key Benefits

## Faster Decisions

Real-time visibility across risk categories enables confident, data-backed actions.

## Reduced Losses

Early warnings + automated alerts = fewer surprises and incidents.

## Increased Compliance

Stay ahead of regulatory changes with live control testing and tracking.

## Stronger Governance

Evidence-rich audit trails and ownership transparency.

## Improved Agility

Adapt risk frameworks as your business evolves – no code required.

## Board-Ready Reporting

Risk heat maps, KRI dashboards, and drill-down insights with one click.

# Built to Fit Your Business

Configurable to your **unique taxonomy and processes**.

Integrates easily with **existing systems**.

Scales from single departments to **global enterprises**.

Take control. Act faster. Risk fearlessly.
